

SEALIFT 2

BELIEVED TO BE ON SITE FROM 2011

FULL WORKING CONDITION WELL SERVICED AND
LOOKED AFTER, REFURBISHED IN 2021

50 TON CAPACITY.

NO OUTSTANDING ISSUES IN FULL WORKING ORDER.

It was built by Sealift 2 International Ltd on the Isle of Wight and used in East Cowes I believe in 2006.

Later through management buyout changed to Sealift 3 Ltd. hence the name of ours.

I believe ours was possibly the 'demonstration project' and moved to Gosport in 2011.

During the refurbishment work in 2021 the following was carried out.

- New salination plant.
- New roof framework.
- Hull repairs.
- Work on the arms – some holes had elongated. Most likely from when it was wrongly towed in one piece from East Cowes to Gosport. It came apart in Portsmouth Harbour entrance.
- Full UHP blast and repaint. This included the insides of the submersible part.

READY TO GO REQUIRES STRIPPING INTO 2 HALVES AND TOWED AWAY .

GA DRAWINGS AVAILABLE ON REQUEST.

5MTRS PLUS WATER REQUIRED TO WORK CORRECTLY.
